

3rd INTERNATIONAL WORKSHOP ON 'NEXT GENERATION NETWORKING MIDDLEWARE' (NGNM06)

in the scope of

Networking 2006

5th IFIP – TC6 Networking Conference

<http://www.ifip-networking.org>

Date: May, 19 2006

Venue: University of Coimbra, Coimbra, Portugal

IMPORTANT DATES

- Submission of papers: March 20, 2006
- Notification of acceptance: April 3, 2006
- Camera-ready due: April 10, 2006

NGNM04 held on May 2004, in conjunction with Networking 2004 conference in Athens, Greece, constituted a forum for the discussion of innovations and recent advances in the design and construction of Internet middleware. Both the requirements and expectations from various perspectives (i.e., networking, middleware and application level) were presented and analyzed. NGNM05 held on May 2005, in conjunction with Networking 2005 conference in Waterloo, Canada, focused on the identification of composite business services running on an Internet middleware platform that allows enterprises/networking actors to publish the services they provide, use services available globally in a secure manner and automatically compile the various services descriptions into executable processes. The special issue on "Emerging Middleware for Next Generation Networks" of Computer Communications journal complemented the success of NGNM04 and NGNM05.

NGNM06 targets to address the challenges of middleware platforms required for new generation mobile/wireless heterogeneous radio networks and services. Mobile/Wireless middleware is anticipated to increase the performance of applications running across potentially mixed wireless networks, to support multiple mobile/wireless devices, to provide continuous wireless access to content and services, to ensure end-to-end QoS and secure content and services delivery and to offer cross-system and cross-layer optimization taking into account issues related to usage behavior, mobility patterns, traffic profiling, network selection and relevant horizontal/vertical handovers.

Authors are invited to submit complete unpublished works as well as works on progress in the following, but not limited to, topic areas:

- Middleware support for micro/macro/multi-domain mobility
- Emerging Information Models and Frameworks (i.e., MPEG-21)
- Specification and enforcement of QoS
- Interworking between Heterogeneous Middleware Technologies
- Self-managing networks (self-healing, self-optimizing, self-protecting and self-configuring)
- Programmable, Active and Adaptive Networks
- Wireless Grids Middleware
- Grid-enabled Networking Middleware
- Performance evaluation and modeling in Wireless/Mobile Middleware
- Middleware support for cross-system and cross-layer optimization
- Middleware security, including authentication and authorization

Submissions

The workshop welcomes original and review papers from academic and industry contributors dealing with the above or related issues. All submissions will be subjected to review by two reviewers. Papers should be up to 6000 words in English, including bibliography and well-marked appendices. To submit a paper, send an email to Prof. George Kormentzas (gkorm@aegean.gr), containing the title, the authors' names, e-mail and post addresses, phone and fax numbers, identification of the contact author, and attach to the same message your paper in DOC format. The paper must start with a title, a short abstract, and a list of keywords.

All the accepted papers will be published in the workshop's proceedings. Furthermore, as it happened with NGNM04 and NGNM05, some selected papers will be extended in order to be considered for publication in a forthcoming special issue of a journal related to the workshop's goals.

NGNM Co-founders

Nikos Anerousis, IBM, USA

George Kormentzas, University of the Aegean, Greece

NGNM06 Co-Chairs

George Kormentzas, University of the Aegean, Greece

Atílio Gameiro, Instituto Telecomunicações, Portugal

NGNM06 TPC Co-Chairs

Maria Teresa Andrade, INESC Porto, Portugal

Jonathan Rodriguez, Instituto Telecomunicações, Portugal

NGNM06 Publicity Chair

Hamid Asgari, TRT, UK

Programme Committee

Toufik Ahmed, University of Bordeaux, France

Eugen Borcoci, Transilvania University, Romania

Raouf Boutaba, University of Waterloo, Canada

Dhnhtra Kaklamanh, National Technical University of Athens, Greece

Alexander Keller, IBM, USA

Wolfgang Kellerer, DoCoMo Europe, Germany

Alexander Konstantinou, IBM, USA

Maria Koutsopoulou, University of Athens, Greece

Marc Lacoste, FT, France

Noura Limam, University of Waterloo, Canada

Thomas Magedanz, Fraunhofer FOKUS, Germany

Ilias Maglogiannis, University of the Aegean, Greece

Alan Marshall, Queen's University Belfast, N. Ireland

Ahmed Mehaoua, University of Versailles, France

Nidal Nasser, University of Guelph, Canada

George Pavlou, University of Surrey, UK

Evangelos Pallis, University of Crete, Greece

Dimitris Pendarakis, IBM, USA

Christos Politis, University of Surrey, UK

George Prezerakos, National Technical University of Athens, Greece

Martin Stiernerling, NEC Europe Ltd, Germany

John Soldatos, AIT, Greece

Rolf Stadler, KTH Royal Institute of Technology, Sweden

Gosia Steinder, IBM, USA

Evangelos Vayias, Intracom, Greece

Iakovos Venieris, National Technical University of Athens, Greece

Michael Welzl, University of Innsburg, Austria
